fun + skills = confidence

Four in a row

1	14	12	16	3	8	13
11	15	5	10	8	0	6
2	13	1	7	4	3	9
6	2	8	9	1	5	5
11	4	13	6	12	2	17
14	10	0	4	7	14	7
3	9	18	12	15	6	10

Each player has a different colour of counter.

Players take alternate turns.

On each turn they roll two dice with ten sides showing 0 to 9.

A player can choose to use either the sum of the two dice or the difference, and puts a counter on a square with that number.

There can be as many counters on a square as there are players.

The winner is the first player with 4 counters in a horizontal, vertical, or diagonal line, as shown below.

9	1	5	5
6	12	2	17
4	7	14	7
12	15	6	10

The adult can be handicapped by only being allowed to use addition.
